**DETAILED ACTION*****Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: the species of the patterns as follows: the species of Figures 2-3, 4D and 7-8, the species of Figure 4A, the species of Figure 4B, the species of 4C, the species of 4E, the species of 4F and 6, the species of 4G, the species of 4H and the species of 4I; and the species of the properties of the first fastening material set forth on page 23, line 9-page 24, line 28 and page 26, line 22-page 27, line 27, e.g., density, friction coefficient, composition, flexure modulus; and the species of the properties of the second fastening material set forth on page 24, line 28-page 27, line 27, e.g., aspect ratio, shape, composition, density. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of pattern, a single disclosed species of property of the first fastening material and a single disclosed species of property of the second fastening material for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 11-21 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3761

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. To be complete one of each of the species of pattern, the species of first fastener property and the species of second fastener property must be elected to be responsive. For example, the species of the pattern of Figure 4B, the species of the property of the first fastener material being density and the species of the property of the second fastener material being aspect ratio could be elected to be responsive.

3. A telephone call was made to Ms. Dudkowski on August 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
